EDUCATION

Brigham Young University December 2027
- BS: Computer Science, Software Engineering Emphasis Provo, UT
- Minor in Math
- GPA 3.92/4.00

PERSONAL PROJECTS

Parasol Loom – 3D Platformer, Unreal Engine 5.5.4 May 2025 – Present

Lead Engineer, Lead Designer

- Design and engineer levels, environments, and gameplay systems to support a strong player experience while accounting for environment artists' workflows and assets.
- Implemented a player character that blends direct player control with context-sensitive behaviors, such as an automatic mantle or leaning towards the direction of travel.
- Addressed playtest feedback on camera control by replacing Unreal Engine's built-in third-person camera with a custom system that moves more smoothly and automatically looks toward the player's direction of travel after five seconds without camera input.

WORK EXPERIENCE

Brigham Young University – Office of Information Technology Apr 2026 – Present

Student Developer – Full Stack Team Provo, UT
- Develop, test, and maintain JavaScript and C tools supporting internal and external customers.
- Resolve incidents affecting application systems used by applicants to BYU-Idaho, BYU-Hawaii, and Ensign College.
- Update college application pages and faculty tools based on test results, customer incidents, and feedback.
- Collaborate with developers and stakeholders in an Agile environment to design, implement, and maintain customer-facing tools.

Brigham Young University – Office of Information Technology Aug 2024 – Apr 2026

Student Developer – Data Integrations Team Provo, UT
- Designed, developed, and maintained dozens of ETL data processes used by BYU (SQL, Informatica Cloud Data Processing)
- Partnered with senior developers to design and implement ETL processes and resolve customer-reported incidents.
- Communicated with campus customers to clarify requirements and validate ETL output.
- Mentored three other students through daily collaboration and weekly one-on-one check-ins to review their goals and well-being

SKILLS

- JavaScript, C, SQL, Python, C++, C#, Java
- Game development: Unreal Engine, Unity
- Korean – Intermediate High, ACTFL OPI
